

Prowise Presenter 10

Opening Presenter 10

All apps have been replaced by a browser version, so Presenter is available always and from anywhere. We recommend you to use the Chrome browser. There are special apps for tablets (iOS/Android) or Prowise Central. The browser version and the app have identical possibilities and functionalities.

Open the browser version

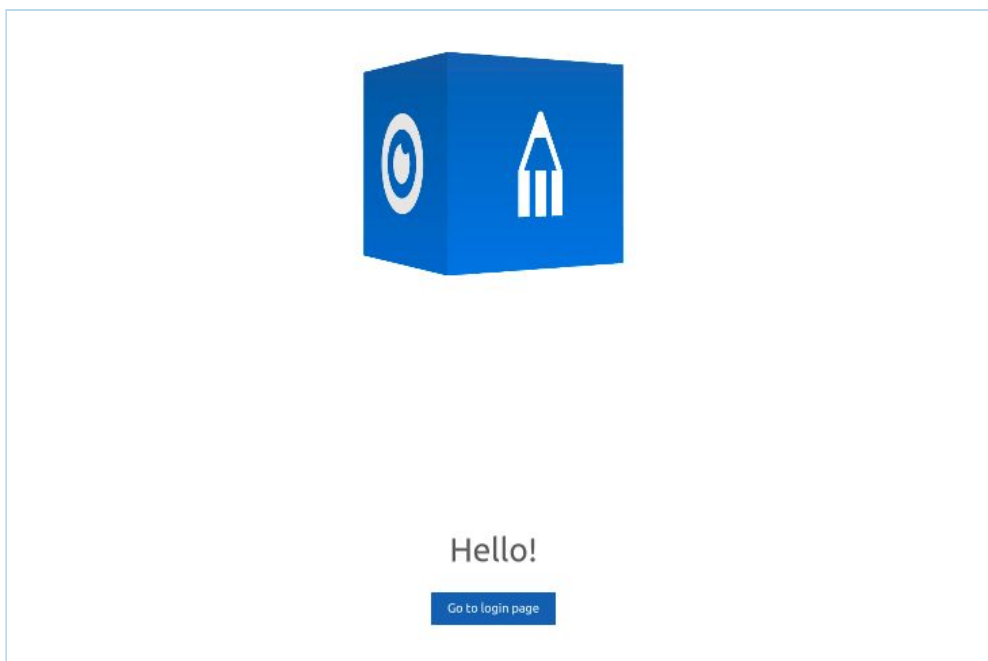

- Open the Chrome browser
- Go to Presenter10.prowise.com

Download the app

- Open the Chrome browser
- Go to Presenter10.prowise.com/downloads
- Follow the installation wizard

Logging in

Once you have opened Presenter 10, a splash screen appears and you are referred to the log-in page.

Enter your email address and password. In case you are already familiar with Presenter 9, you can use the same log-in details.

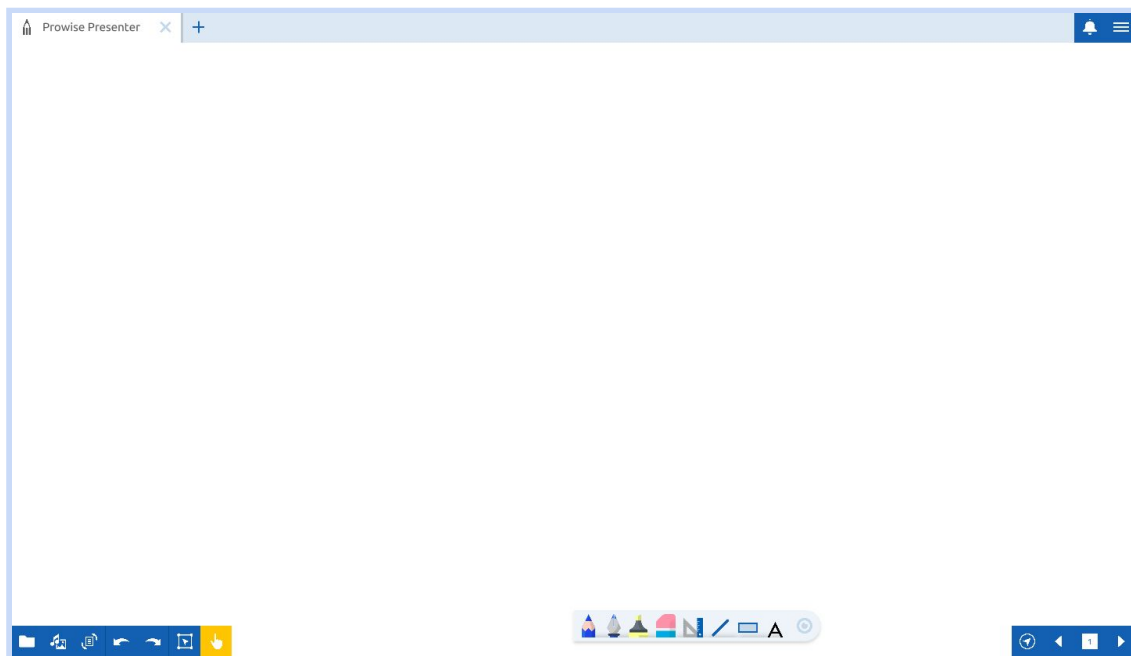

Forgotten your password? Please [click here](#).

Are you new to Prowise Presenter?
Please [click here](#) to register.
Welcome to the Presenter Community!

Once are logged in, you see the home screen of Presenter 10 and you can get started with all functionalities of the software.

Home screen

The home screen of Presenter 10 is displayed below. We explain the buttons that are visible.

Tabs

In Presenter, you can open multiple Presenter files next to each other. Each Presenter document has its own tab.

- Click on the '+' symbol to open a new file. You can open a maximum of two tabs at the same time per lesson.
- Click on the 'x' symbol to close a Presenter file.

Notification manager

Notifications on executed actions are collected in this drop-down menu.

Menu button

When pressing this button, you can choose to select full-screen mode, go to the account page or log in or out.

File management

The options in file management are further explained below.

New

Here, you can open a new Presenter file. In Presenter, you can open a maximum of two files at the same time. Each Presenter document has its own tab.

Open

Here you can open a saved Presenter file. Files that have been created in earlier versions of Presenter can also be opened, edited and saved in Presenter 10.

The following components will be retrieved:

- Text
- Grouped objects
- Boxes
- Images
- Pictures
- Backgrounds
- Sounds
- YouTube videos
- Figures
- Lines
- Drawings
- Tools

A notification appears when an objects has not been implemented in Presenter 10 yet.

Just like in Presenter 9, the following functionalities can be applied in your current lessons: duplicating (infinitely), cropping, ordering, grouping and transparency.

Save as

You can save a Presenter document in the following places:

- Private
- School
- Management

Select where you want to save the document and then press 'Save'. You can also select a subfolder to save the file in and then select 'Place here'. You can also save files in the Community. This means that all Presenter users can open your Presenter file. The Community also has a Prowise folder that you can use for inspiration. It is not possible to add files to this folder.

Enter a title and description in the two text boxes. At the bottom of the screen you see a preview with the first page of your Presenter file. Data that is added to your document automatically is displayed on the right. Select the pencil to change the age of the target group.

Finally, select 'Save as'.

Presenter lesson

Edit title*

Description

400

In case you have opened a Presenter 9 file, you can edit it and then save it in Presenter 10. To do so, select the 'Save' or 'Save as' buttons.

If you click on 'Save', your Presenter 9 file will be overwritten. If you click on 'Save as', a new version of your file will be created.

In both cases you can open, edit and save the file in Presenter 10.

Media library

With the (new) media library you can add the following components:

3D models

You can now directly insert 3D models in your Presenter document. Inspect the models from different angles and zoom in on the finest detail. There are six different categories: geography, history, nature, mathematics and chemistry & engineering. The amount of 3D models is steadily increasing.

Illustrations

The illustration you are already familiar with from Presenter 9, but now updated and redecorated. The illustrations are free use. There are seven main categories: English, mathematics, world orientation, arts, physical education, class management and themes.

Sounds

We have added several new sounds in Presenter 10 that you can add to your Presenter file. They are categorised in: numbers, animals, domestic sounds, letters, human sounds, musical instruments and modes of transportation.

Backgrounds

You can add backgrounds in the media library or page manager. The background covers the entire page. The options of zooming in and out, adding the writing direction and margins are pending, and so is the possibility to clear the background. There is the option to choose a white background, in case you do not like the current background.

Tools

The tools you are familiar with from Presenter 9, but now with a new design. Several new tools have been added too. Not all tools are available yet at this point. Besides a new design, the functioning of many tools has been adjusted.

Touch Table tools

The Touch Table tools can be accessed from the media library. Currently, you are not able (yet) to save these in your Presenter file. The Touch Table tools are available in the app and the browser version. The tools have been reviewed critically and improved substantially.

3D tools

Not to be confused with 3D models. The 3D tools contain additional information about the components of the object.

Images

In Presenter 10 you can insert images directly from the internet into your presentation, like you always could. View images of NASA and Flickr The Commons.

Videos

Search for videos on YouTube.

ProConnect

Click on the 'ProConnect' button to make the ProConnect menu appear.

To start ProConnect, press 'Start'

The group code is displayed in the top-right corner. The code remains visible throughout the session, unless you choose to hide the menu. The menu contains the option to 'vote'. The ProConnect tools can be accessed from the media library. Of course, the remaining ProConnect activities will follow soon.

Students can participate in a ProConnect session via <https://connect.prowise.com/>.

Click on 'Participants' to show the participants that are logged in. A menu in which you can choose to pause or stop participants appears.

The icons in the green bar in the ProConnect menu represent:

- Minimise the window
- Back to initial window size
- Select the code in the ProConnect bar to blow it up and show it in full-screen mode.
- Click on the stop button to terminate a ProConnect session. The connection with the participants will be broken this way.
- Hide activity log
- Show activity log
- Group code in full-screen mode

Increase the size of this window by dragging the dots in the corner. Move the window by dragging the blue bar. Close the window with the 'X' icon in the top-right corner.

Select 'Vote' in the ProConnect menu to make the menu appear. Click again to hide the menu. Next, choose your preferred voting options at the bottom of this window.

- Select one or multiple options:
 - A
 - B
 - C
 - D
 - E
 - F
- Choose one option:
 - Agree/Disagree
 - Yes/No
 - True/False
 - Correct/Incorrect
- Select one or multiple options:
 - Red
 - Blue
 - Green
 - Yellow
 - Orange

Undo buttons

Besides the 'undo' button, the 'redo' button has now been added.

- Undo button
- Redo button

Selection button

The 'selection' button has been modified. Make sure to have added an object, choose the select button and click on the object.

Selection dots will appear around the object. These are four large, dark blue dots in the corners and four small light blue dots along the lines connecting the corners. In the bottom-right corner of the object you see a circular arrow. Once you select it, you can rotate the selected objects.

Also above the object, buttons will appear. A clarification of the buttons, from left to right:

The following editing options are currently active:

Edit button

Cut

Copy

Duplicate

Infinite duplication

Paste

Group

Image cropping

Transparency

Order

Align

Add a direct link to an object.

The following actions will become active:

- Hide answer -?-
- Hide answer
- Right answer sound
- Right answer green box
- Right answer check mark
- Wrong answer sound
- Wrong answer red box
- Wrong answer X icon

Choose from the different sounds and add them to the selected objects.

Adding a link to a web page or other page to your Presenter file.

Web link

Type or copy/paste a URL in the white text box. Then click 'Apply'. Use the control button and click on the object to verify whether the link is working.

Web link Page link

Place web link here

Apply

Page link

Use the arrow buttons to determine the page to which the link must refer. (Note: this only works if your Presenter file consists of multiple pages.) Then click 'Apply'. Use the control button and click on the object to verify whether the link is working.

Web link Page link

< 1 >

Apply

Add frames to the selected object.

You can lock and unlock the object by using the lock button.

Click the trash button and the object will disappear.

Control button

The control button remains unchanged in comparison to Presenter 9. With the control button you can control the tools and drag unlocked objects across the page.

Toolbar

In Presenter 10, the toolbar has been detached from the taskbar and can be moved around by using the button with the Prowise eye icon on it.

The options on the toolbar from left to right:

- Pencil
- Calligraphy pencil

- Highlighter
- Eraser
- Lines
- Figures
- Text

Writing tools

When selecting the writing tools, the three favourite colours appear. The preselected colours can be adjusted. You can do so by clicking on one of the three preselected colours. A window will appear and you can choose another colour.

The three most-recently selected colours are saved by the writing tools and will appear first the next time you use it. The range of colours you can choose from will be expanded soon.

The same toolbar also offers the possibility to adjust the size of the line you write with. When you select the wavy line, a slider will appear. You can use it to adjust the thickness of your pencil lines.

You can also choose a colour for filling. Once you draw a line, the space between the starting and ending point will be filled with the chosen colour automatically.

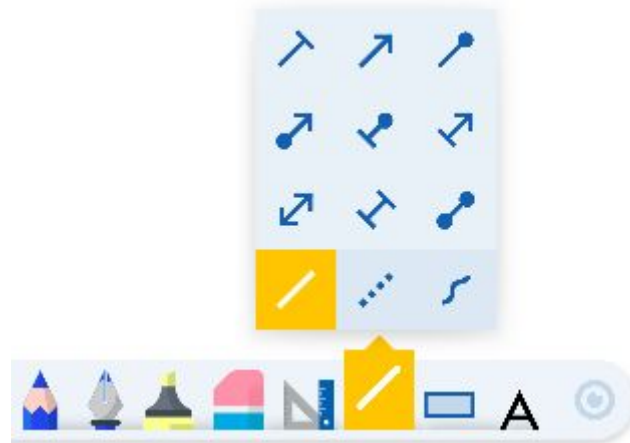

Eraser

Use the eraser to erase lines, figures and drawings. Currently, the entire figure is erased when you select it with the eraser. We are working on this, so you can also erase only parts of a figure.

Lines

You can add several lines to your file from the toolbar. You can use the line when you click on it. When you click on it again, a drop-down menu appears.

From this menu, the bottom three options are to select a straight line, dotted line or free line. You can choose different starting and ending points for each of the three lines from the options provided above it. Click on the selected icon from the options provided above the bottom three lines again to go back to using a single (dotted) line.

Figures

You can add several figures to your file from the toolbar. Choose a figure and adjust the colour and size of the line if you so desire. Use the mouse, pencil or your finger to drag and draw a figure on the canvas. You will see that a figure is shaping. You can also apply the editing feature to the figure. Changing colours will become available at a later stage.

Text

Select the text button and click on the canvas to start typing. The text box will get bigger as you add text. You can also adjust the text box to the size you think you need by dragging the dots. Caution: when adjusting the text box manually, it will no longer automatically adjust to the size of the text. In this version you can adjust the font, font size, font style and font colour. You can also adjust the alignment of the text.

Shortcuts

Several shortcuts have been activated in Presenter 10 after selecting an object:

- Ctrl + X Cut
- Ctrl + C Copy

Ctrl + V Paste
Delete Delete

Page manager

Just like in Presenter 9, you can find the page manager in its familiar place in the bottom right corner.

Browse through your file with the arrows. The page you are currently on is displayed in the middle.

When you select a page number, a drop-down menu with the contents of the other pages opens.

There are two options in the drop-down menu:

Duplicate a page by pressing the duplicate button. This page will then show up below the created page.

Use the copy button to copy the page to another document. The page will then open in a different tab in the app (tabs are visible at the top in Presenter).

Each page has three dots in the top-right corner. Click on the dots to unfold a menu. Here you can choose to adjust the position of the page, choose a background or delete a page. You can also delete a page by selecting it and clicking on the bin icon in the page manager in the bottom right corner.

Each page also has 6 dots in the top-left corner. Use the dots to move the page around on the screen.

Page navigation

Next to the page manager, you will find the page navigation button. This allows you to control the entire page.

When you select the page navigation option, a drop-down menu opens with six options:

Browse the page manually

Zoom out button

Zoom in button

Return to the initial zoom by clicking on the 100% button

With this overview option, all objects that have been placed on the infinite canvas are displayed. Presenter automatically zooms out and aligns all the content on the canvas to the size of the page.

Return to the starting position of your page. Use this button to easily return to the centre of your Presenter 9 file.
